Direction for Questions 116-122: Read the passage given below and answer questions:

One of South America's mysteries is Easter Island. Easter Island, also called Rapa Nui and Asia de Pascua, 3,600 km (2,237 mi) west of Chile, is a volcanic island with an interesting and partly unknown history. The island was named by the Dutch explorer Jacob because he encountered it on Easter Sunday 1722. He was the first European to find the island. The official name of the island, Asia de Pascua, means Easter Island in Spanish. The island is famous because of the approximately 887 huge statues which were found there. The statues consist of heads and complete torsos, the largest of which weighs 84 tons! These monuments, called May, were carved out of compressed volcanic ash, called tuff, which was found at quarry at a place called Rano Raraku. Statues are still being found. Some of the monuments were left only half-carved. Nobody knows why Rano Raraku was abandoned. It is thought that the statues were carved by the ancestors of the modern Polynesian inhabitants. But the purpose of the statues and the reason they were abandoned remain mysteries.
